

KESO CLIQ® Go

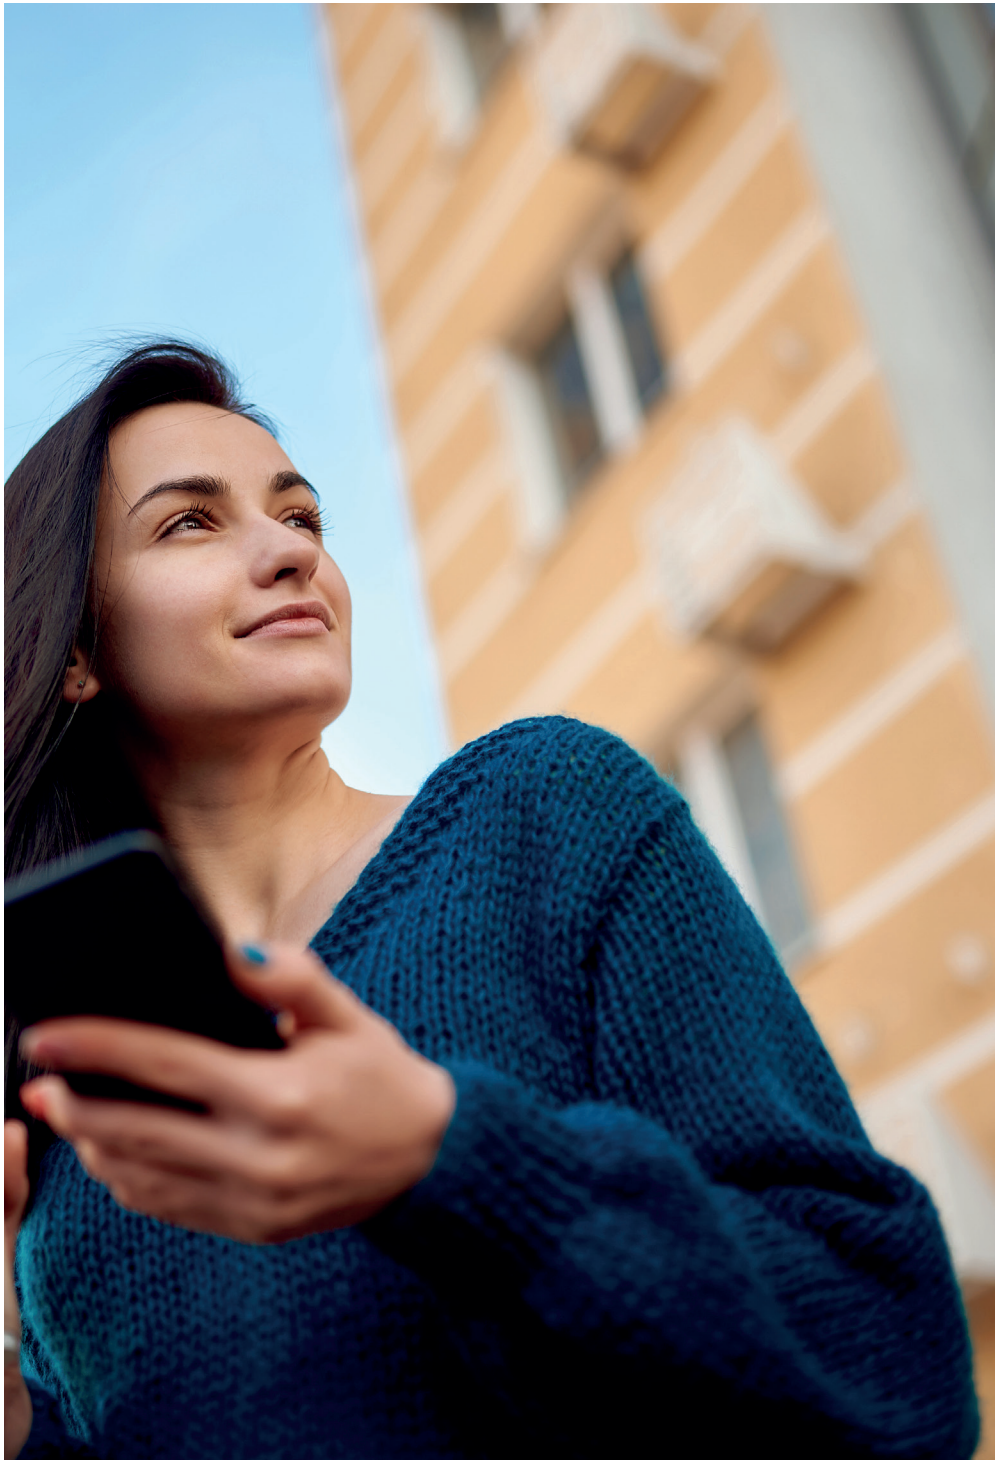

The smart solution for small-scale master key systems

For small and medium-sized enterprises
and private residential areas

Experience a safer
and more open world

The modern CLIQ® Go locking system adapts flexibly to meet your needs

CLIQ® Go is a purely electronic locking system that is easy to install and convenient to manage with the user-friendly CLIQ® Go app. Access authorisations can be programmed as desired and changed as required. Lost keys can be blocked instantly. This offers maximum convenience for the entire building in private homes and small to medium-sized businesses.

Additional advantages:

- Manage access authorisations via smartphone, tablet or PC
- Easy installation without wiring
- Keys can be quickly blocked if necessary and unlocked again later
- Authorisations can be issued within specific time slots, for example on Wednesday from 7 a.m. to 9 a.m.
- Versatile cylinder selection usable for anything from letter boxes to second garages
- The battery-operated key is also the power source for the cylinders, so no door wiring is necessary

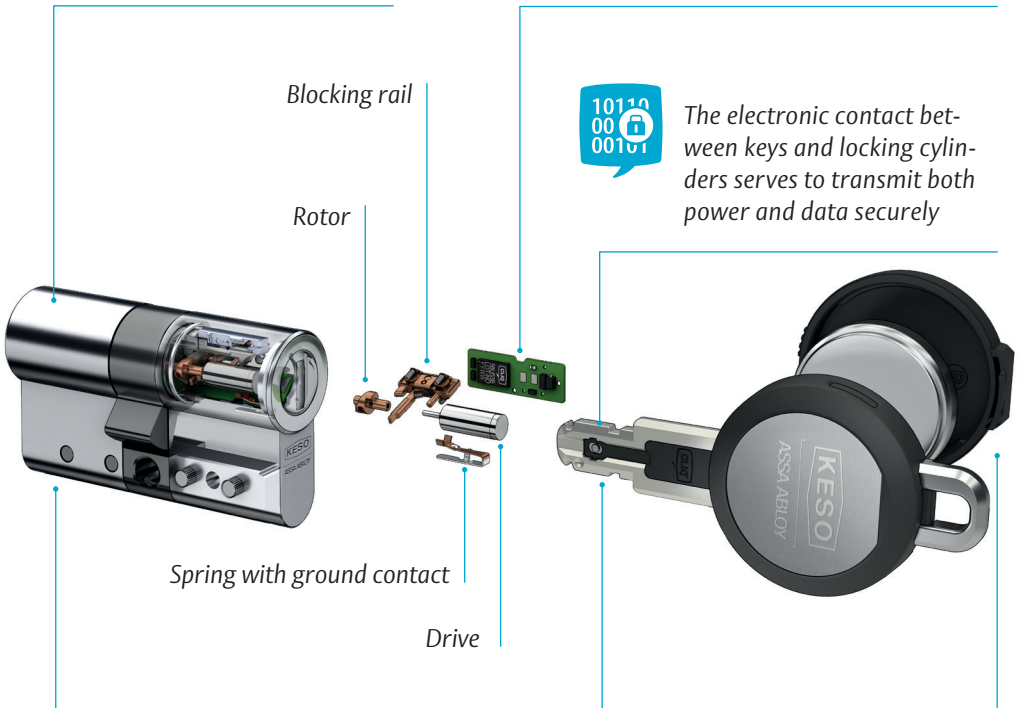

Quicker and easier cylinder installation without wiring

New, future-oriented CLIQ® chip generation with AES encryption and fast processing speed with efficient energy management

The electronic contact between keys and locking cylinders serves to transmit both power and data securely

Keys and cylinders can be programmed with flexible locking authorisations and schedules

Waterproof and dust-proof key head with battery and electronic board

Rapid replacement of the standard battery in the key – without the use of tools

CLIQ® Go – the system for electronic closing

Durable, secure and efficient

CLIQ® Go is a cloud-based system with app and works with Android and iOS tablets, smartphones as well as Windows PCs.

CLIQ® Go is a purely electronic locking system based on the precision mechanics and microelectronic components of CLIQ® technology from ASSA ABLOY. The electronics in the programmable, waterproof key and compact electronic locking cylinder guarantee the highest possible level of security and reliability. CLIQ® Go solves the problem of lost keys. Since each key is individually programmable, it is easy to delete locking authorisations – no matter where they are. Each key can use the new access authorisation to update the respective cylinder. This does not require an additional programming device.

The cloud-based system works seamlessly via the CLIQ® Go app. An authorised specialist dealer can also handle the management of the locking systems as an option.

*Secure your alarm system
with a half-cylinder*

*Secure the entrance door
with a double cylinder*

*Secure cabinet doors
with a furniture olive*

*Secure desk drawers
with a furniture cylinder*

*Secure your letterbox
with a camlock*

*Secure basement
partitions with a padlock*

A wide range of potential uses – offers complete flexibility

Access requirements can change very quickly: CLIQ® Go allows you to manage access in real time.

Compact CLIQ® Go locking cylinders offer a very high level of security. Thanks to the large selection of different types of cylinders, the system is suitable for a variety of applications – from your entrance door to the securing of alarm systems, doors and cabinets.

With comprehensive certification for a variety of applications, including outdoor installation, you are exceptionally well equipped for all current and future requirements. Programming devices for the updating of keys are available as tabletop and mobile units. The optional Connect key can even be programmed directly from the smartphone via Bluetooth using the Connect app.

Lost keys – can easily be deactivated with the CLIQ® Go app

Lost keys can be a serious security risk. CLIQ® Go allows you to revoke access authorisations any time, any place.

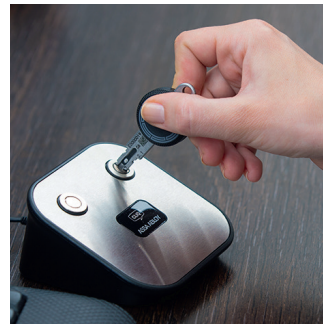

1. Your colleagues at the reception desk will notify you if a key is lost.
2. You can block the lost key with the CLIQ® Go app.
3. Then reprogram a key and use it to withdraw the access entitlements at the relevant doors.

3.

Grant access to a room – easily with the CLIQ® Go app

Access requirements can change very quickly and you have to act quickly too. CLIQ® Go allows you to manage access in real time.

- 1.** Your assistant doesn't have authorisation to access a room. She calls you and asks you to grant her authorisation.
- 2.** You inform your colleague at the reception desk, who quickly and easily changes the access authorisations using the CLIQ® Go app.
- 3.** She goes to your assistant with a mobile unit and programs the key on site. Your assistant can now unlock the room.

3.

Always at your fingertips: CLIQ® Go saves you a lot of time and money

If your company changes,
you must be able to rely on
the flexibility of your locking
system.

Would you like new keys or cylinders? Call your specialist
partner and they can program new components for you and
deliver them immediately.
